

**TABLE 15. FLOOD DAMAGE ESTIMATES**

Source: *Corangamite Floodplain Management Strategy, 2002*, Corangamite Catchment Management Authority

| BASIN                                   | AVERAGE DAMAGE COST (\$M/YR) | GENERAL FLOOD RISK |
|---|------------------------------|--------------------|
| Moorabool River                         | 0.54                         | Low                |
| Leigh River (subcatchment of Barwon)    | 1.76                         | High               |
| Barwon River                            | 1.62                         | Medium             |
| Hovells Ck. (subcatchment of Moorabool) | 0.44                         | Medium             |
| Corangamite                             | 1.08                         | Low                |
| Otway Coast                             | 0.71                         | Medium             |
| TOTAL                                   | 6.00                         |                    |
