

TABLE 32. TARGETS FOR THE REGIONAL ASPIRATION - HEALTHY ESTUARIES, COASTS AND MARINE SYSTEMS

ASSET	THREAT	RESOURCE CONDITION TARGETS	MANAGEMENT ACTION TARGETS
Coasts and marine	Changed estuarine flows, weeds, poor on-ground management, land use change/land clearing, population pressure, inadequate strategic management	<p>AB. By 2010, increase the range and abundance of threatened native fish in all estuaries from 2003 levels.</p> <p>AC. By 2020 coastal wastewater treatment plants meet tertiary treatment standards.</p> <p>AD. The marine coastal waters ecological condition is maintained to 2003 condition.</p> <p>AE. Ensure development of coastal areas is in line with Victorian and Regional Coastal Board strategies and plans.</p>	<p>72. Prevent loss of habitat, and restore systems to natural condition wherever possible.</p> <p>73. Enhance upstream and estuarine wetlands to assist in the restoration and maintenance of the ecological function of estuaries.</p> <p>74. By 2008, actively develop and implement 18 Estuary Management Plans in Central West Estuaries.</p> <p>75. By 2006, develop a marine monitoring program of appropriate indicators for coastal waters.</p> <p>76. In 2006, commence five-yearly environmental condition reporting for marine waters.</p> <p>77. Support ongoing implementation of the Great Ocean Road Regional Strategy.</p> <p>78. By 2004, Management Action Targets will link catchment impacts to Marine National Parks.</p>
