

**TABLE 34.** TARGETS FOR THE REGIONAL ASPIRATION - IMPROVED CONSERVATION STATUS OF ALL VEGETATION COMMUNITIES AND NATIVE FLORA SPECIES

ASSET	THREAT	RESOURCE CONDITION TARGETS	MANAGEMENT ACTION TARGETS
Vegetation		AG. Enhance the quality of existing native vegetation by managing 90% of native vegetation on both public and private land according to best management practices by 2020.	<p>83. By 2005, establish a baseline of vegetation quality through a Regional assessment.</p> <p>84. By 2005, establish baseline Regional best management practices for vegetation quality enhancement and revegetation.</p> <p>85. By 2007, ensure that 66,000 ha of remnant vegetation on public and private land is managed according to best management practice.</p> <p>86. By 2007, improve the capacity of land managers to be able to meet Regional BMPs for native vegetation management and revegetation.</p>
Vegetation		AH. Strategically increase the overall cover of each EVC to at least 10% of the pre 1750 levels by 2020.	87. By 2007, establish 2,225 ha of revegetation for targeted high priority EVC's.
Flora		AI. To reduce the impact of ecologically significant invasive species.	<p>88. By 2004, implement priority actions outlined in Flora and Fauna Guarantee Action Statements as determined through Priority Actions Information Systems.</p> <p>89. By 2005, establish a benchmark of the extent/ nature and impact of ecologically significant invasive species.</p> <p>90. By 2008, develop and implement Prioritised Action Plans to reduce the impact of ecologically significant invasive species.</p>
